

SEISMIC & MICROSEISMIC CAPABILITY

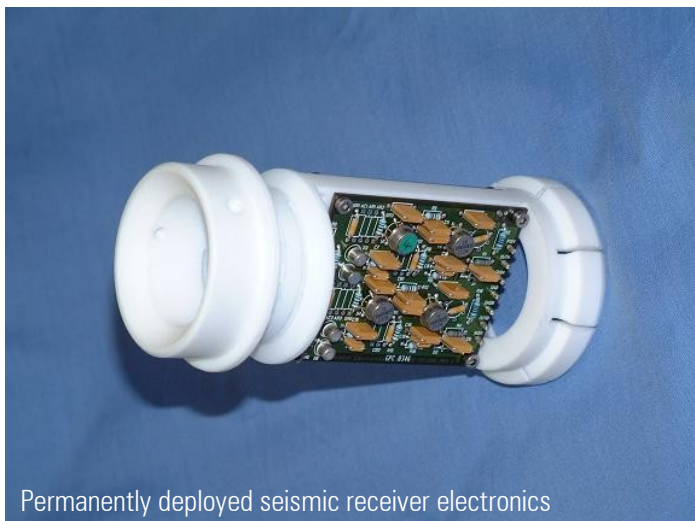

DESIGN, BUILD & TEST CAPABILITIES

- Accelerometer, Geophone and Hydrophone based seismic receivers
- Components and materials testing
- Test and upgrade of clients equipment

PREVIOUS PROJECTS

- Permanently deployed seismic receivers at 160°C
- Hydraulically clamped 3 & 4 component accelerometer based seismic receivers
- Sonic Tools
- 5 element hydrophone string at 200°C
- FM and digital transmission systems at 200°C

Permanently deployed seismic receiver electronics
